

"ADVOCACY FOR AGROECOLOGY PARTNERSHIPS"

28-29.06.2023

MAISON NOTRE-DAME DU CHANT D'OISEAU, BRUSSELS

This event is designed to share the outcomes of the Erasmus+ SALSIFI (Supporting Advanced Learning for Stakeholders Involved in Sustainable Food systems Initiatives) project, engage with policy makers, public authorities and grassroots movement experts, explore the content and deliverables, and reflect on the future value of the materials and the interventions possible using the project outcomes.

On day one, we will present the state of advocacy affairs in the project contexts by showcasing the **Food Policy Handbook**, featuring case studies and policy country reports from **8 European countries**, explore the way public procurement and agroecology interact with advocacy, and unveil the EU advocacy component of our digital, four-module training programme.

On day two, we hope to engage in robust exchanges with representatives from **grassroots movements and public authorities** by presenting and discussing the ADVOCADO, our innovative learning platform which features 4 **advocacy courses** developing different skills for advocacy at various levels (local, national, EU, Eastern Europe). Throughout this event, we shall include space for interrogation, exchange, and feedback.
